Art Unit: 1647

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 3, 5, 6 and 11, drawn to a method of inhibiting cholesterol uptake in the gut by administering an inhibitor of ABC1, classified in class 530, subclass 388.22+.
- II. Claims 4 and 15, drawn to a method of inhibiting cholesterol uptake in the gut by administering an agent that reduces the number of ABC1 transporters, classified in class 536, subclass 24.5.
- III. Claim 7, drawn to a method for testing humans for their allele of the ABC1 gene by measuring carotenoids, classified in class 435, subclass 7.1+.
- IV. Claims 8, 12, 13, 14 and 16, drawn to a method of assaying drugs to test if they bind and inhibit ABC1, classified in class 530, subclass 388.22+.
- V. Claim 9, drawn to a method of testing cholesterol-lowering agents by feeding them to WHAM chickens, classified in class 536, subclass 23.5.
- VI. Claim 10, drawn to a method of testing cholesterol-lowering agents by measuring inhibition of ABC1 as well as the lack of activity in stimulating insulin production, classified in class 536, subclass 23.5+.
- VII. Claims 17-21, drawn to a ligand of the ABC1 transporter, classified in class 536, subclass 23.5+.

Art Unit: 1647

The inventions are distinct, each from the other, because of the following reasons:

Inventions I –VI are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps, and goals.

Furthermore, Invention I is related to Invention VII as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the ligands can be used to identify the ABC1 transporters. Similarly, cholesterol transport in the gut can be inhibited direct inhibition of cholesterol transporters.

Inventions II and III are unrelated to invention VII. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the ligands of Group VII are neither used in nor produced by either of Inventions II and III.

Inventions IV, V and VI are related to Invention VII as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the

Art Unit: 1647

product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, peptide ligands can be used to generate antibodies.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143)

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).

Advisory information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sandra Wegert whose telephone number is (703) 308-9346. The examiner can normally be reached Monday - Friday from 8:30 AM to 5:00 PM (Eastern Time).

Art Unit: 1647
